"Mom, my head really hurts," Luis said.  
"Maybe we need to go see Dr. Clark," Luis' mom said.

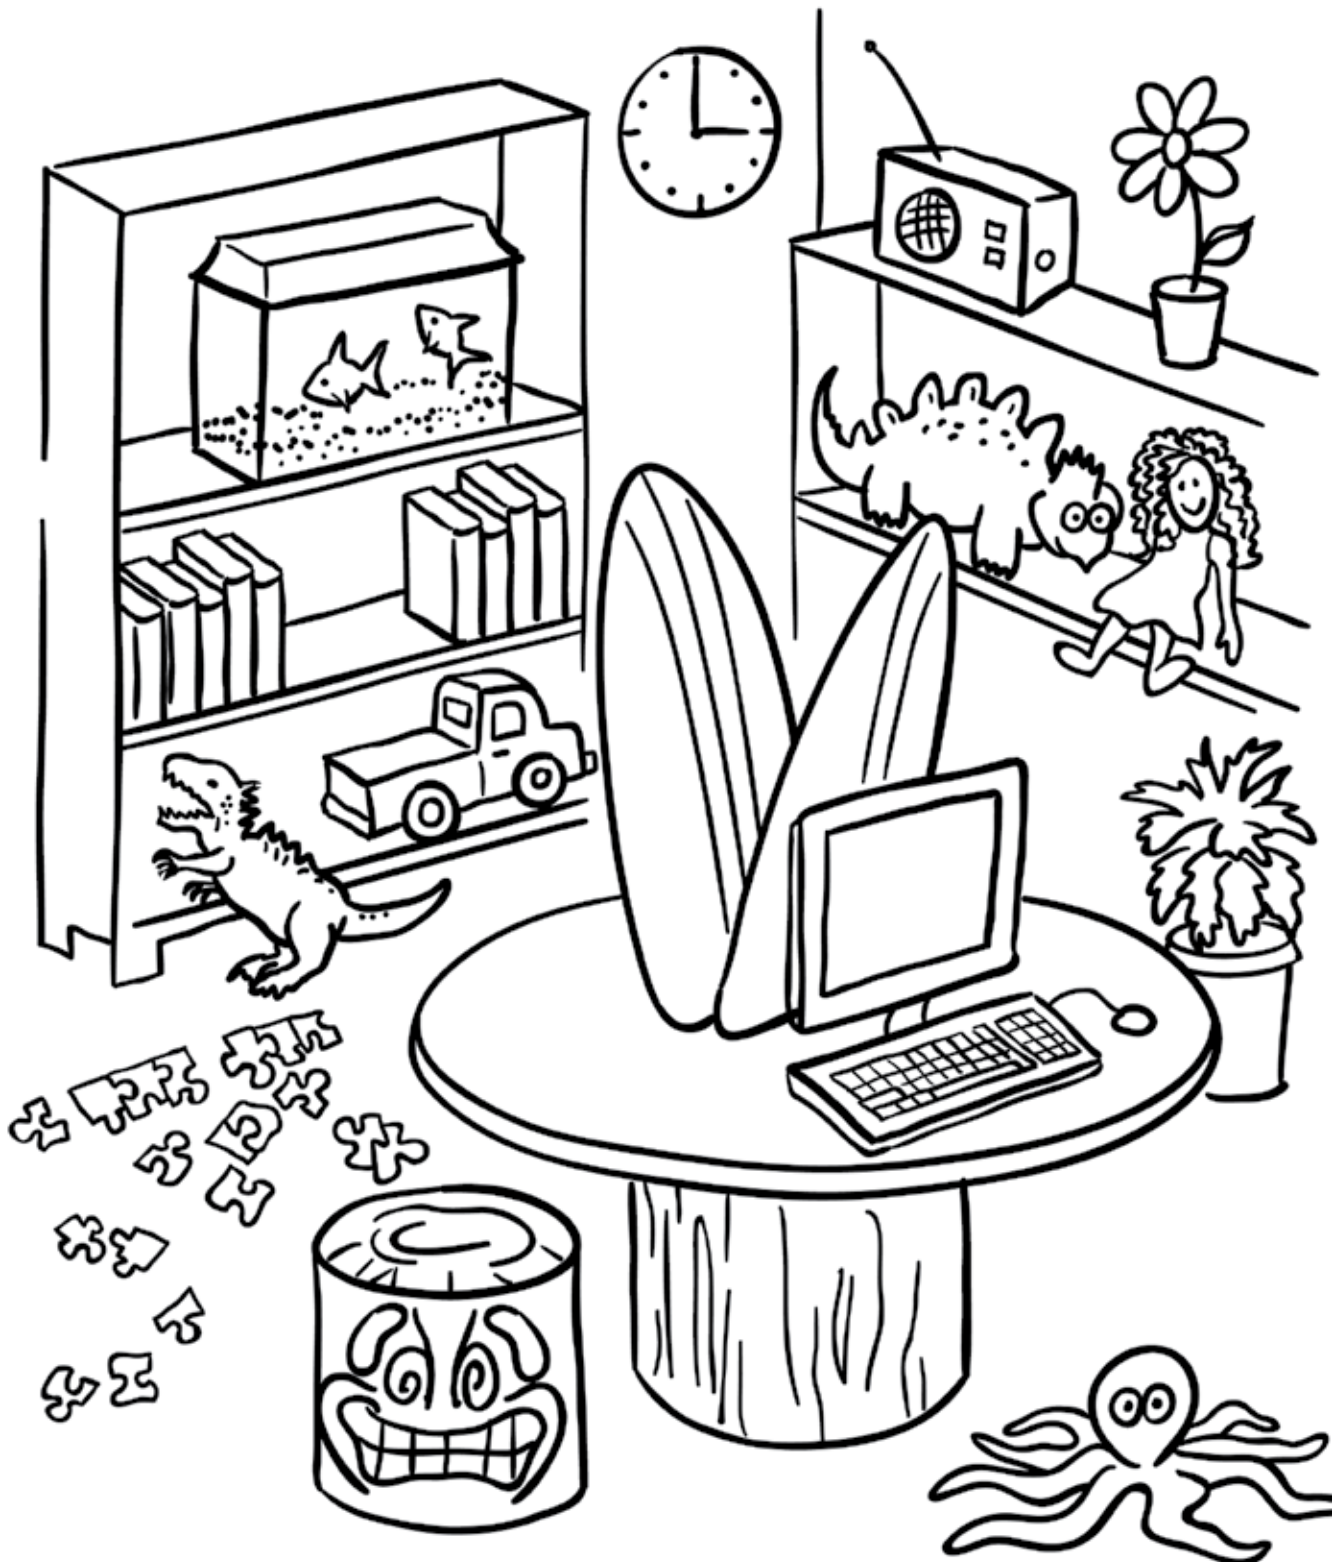

At Dr. Clark's office, Luis read the eye chart.  
He got all of the letters right!

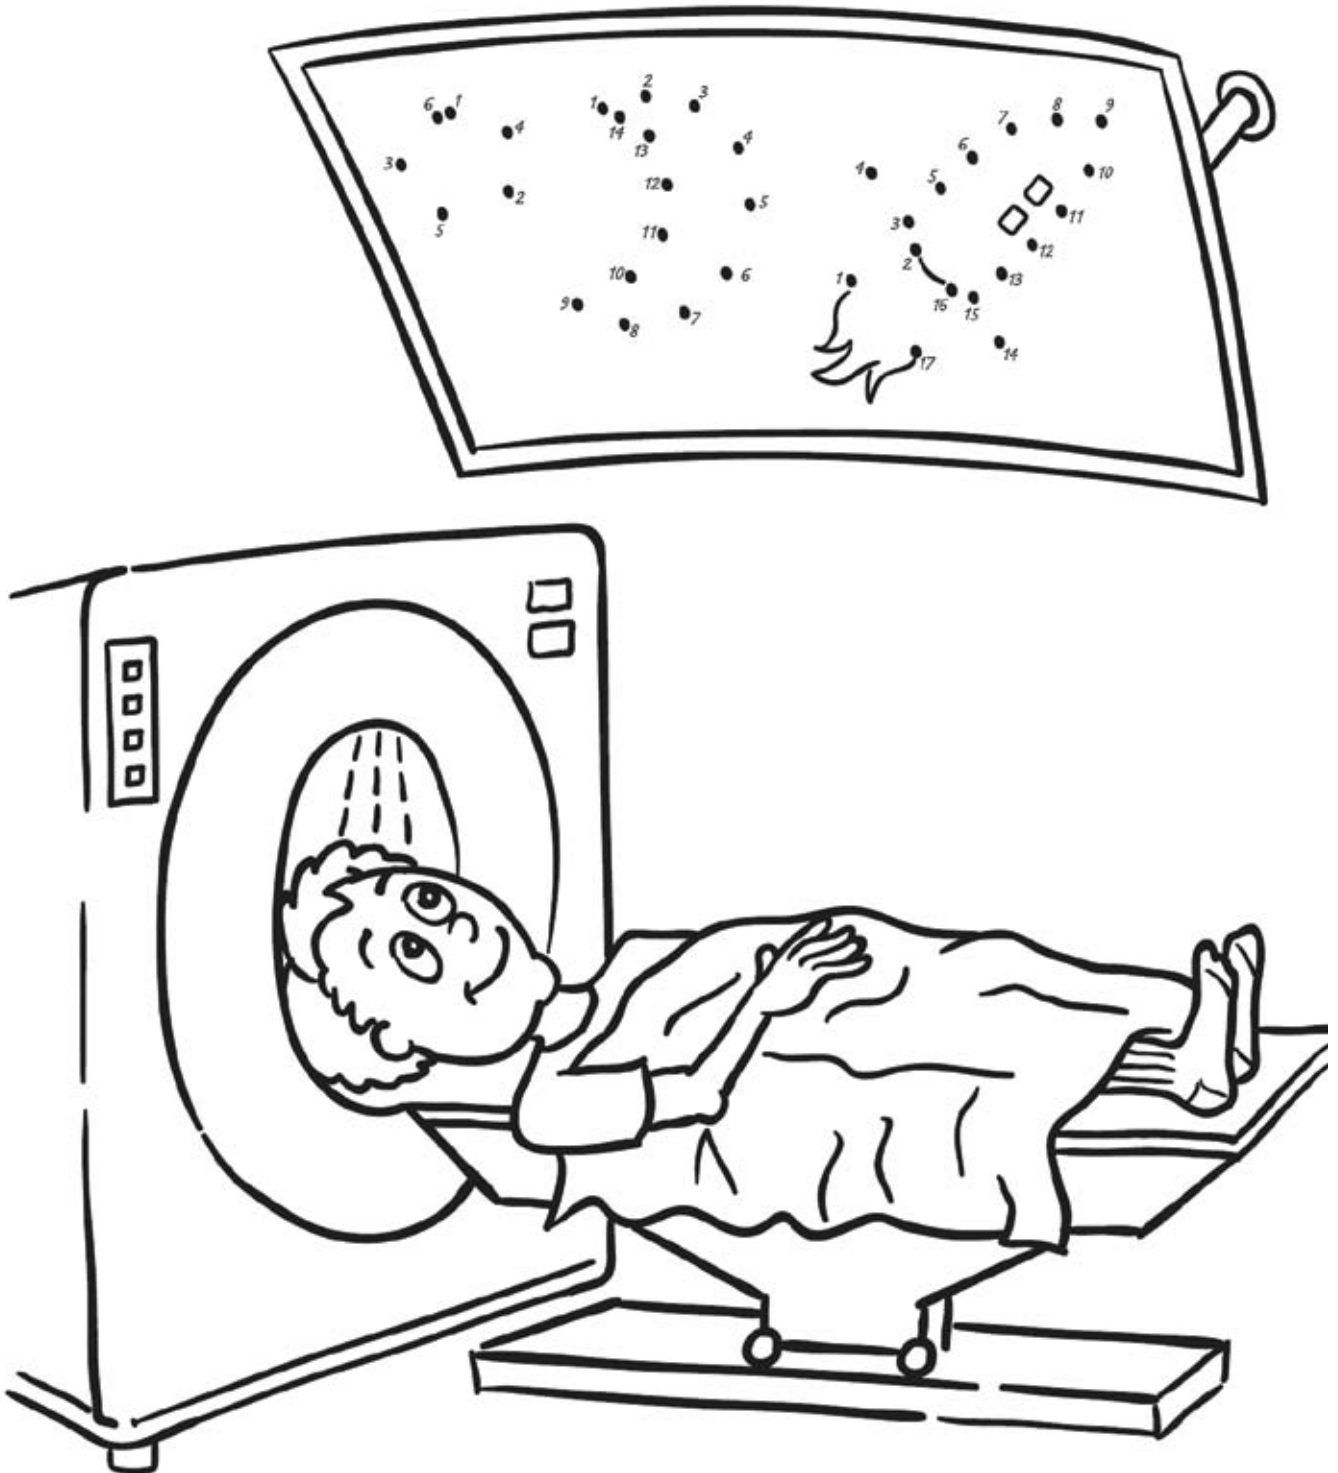

Dr. Clark told Luis' mom to make an appointment for Luis at Baptist Children's Diagnostic Center at Baptist Medical Plaza at Country Walk. Help Luis' mom find her way.

When Luis walked into the lobby he thought,  
"Wow! This place looks like fun. What should  
I play with first?"

Count the toys on the bookshelves: \_\_\_\_\_

The friendly technologist called Luis' name and he and his mom went into another room. There, Luis got to watch a light show while a machine took pictures of his head.

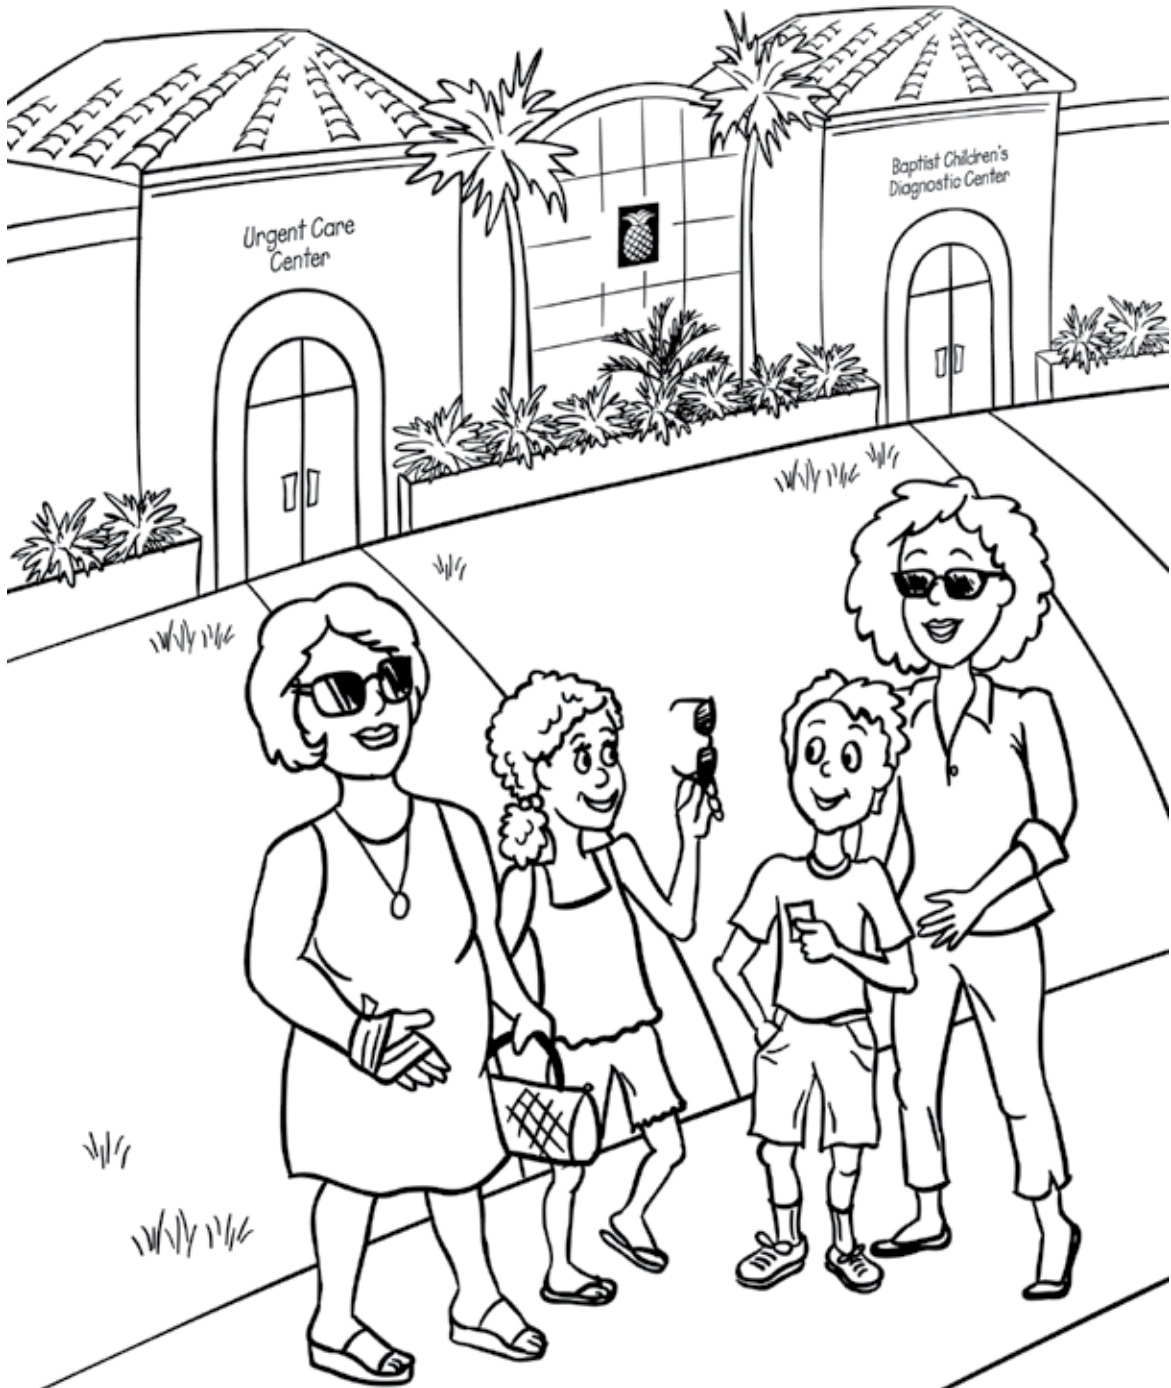

Connect the dots to see what Luis sees.

“Bye, Luis. We hope you feel better,” the lady at the desk said after handing him a sticker. “Bye!” Luis replied. “Mom, I was scared at first, but it didn’t hurt at all. And, I really liked the show.”

"Look, there's Patricia. She's in my class," Luis said to his mom.  
"Why does your mom have a bandage on her hand?" Luis asked.

"She cut herself while cooking, but she's okay now that she went to the urgent care center," Patricia explained.

"We're on our way to the zoo now, why don't you two come with us?"

"Sure, but only for a little while. Luis needs his rest." Luis' mom said.

The next day, Luis and his mom went back to visit Dr. Clark.

“Luis, I received your test results. You have a sinus infection, which is why your head has been hurting. Take this medicine for a couple of weeks and then you should feel much better,” Dr. Clark said.

“Will I get to go to that cool place again?” Luis asked.

“You don’t need any more diagnostic tests right now, but you can always visit the Baptist Children’s Diagnostic Center to say hi to your new friends. I am glad you had fun there,” Dr. Clark said.
